## **Department of Computer Science and Design**

Academic Year:2025-2026  
Even

Semester:

### **NEXOVATE'26**

#### **PAPER PRESENTATION**

#### **Rules & Regulations**

- The topic for the paper presentation can be on any of your choice.
- Write a short abstract (1-2 paragraphs) that explains what the work is about, how it is done, and why it is important.
- Include details of existing work to explain what has been done before and the problems with it.
- Clearly describe the proposed work, showing your ideas or solutions to improve on the existing work.
- Share the results and conclusion, explaining how your work makes a difference or solves the problems.
- Talk about future work, explaining what you will do next or how the work can be improved further.
- Use a maximum of 7 slides for the presentation, and keep it within 5-7 minutes.
- To register, submit a 1-page abstract that briefly summarizes your presentation.
